Projects

Festopia | festopia.porschajohnson.com **June 2017**

- Festival finder application within Metro Atlanta, built with HTML5, CSS3, Javascript, jQuery, Node.js, Express, MySQL, Bootstrap, AWS EC2.
- Built the database and wrote queries to extract information via filters (cost, family-friendly, etc).
- Created a template to allow for consistent design across various festival category pages.

Vegan's Delight Services | vegansdelightservices.wordpress.com **August 2017**

- Designed a mock up for a health and wellness side project to familiarize myself with the Wordpress interface.
- The purpose of this project was to highlight my simplistic design and copywriting skills for potential freelance opportunities.

WriteIT | writeit.porschajohnson.com **August 2017**

- Productivity tool for writers, offering a variety of ways to organize & plan manuscripts.
- Built with React/Redux, jQuery, HTML5, CSS3, Javascript, Express, SASS, Node.js.
- Used React Bootstrap to design: Resources Page, FAQ page and main Dashboard.
